Location: Moscow, open to visa sponsorship | English – [Upper Intermediate](#)

## **Summary**

Senior .NET Developer with 12+ years of experience in developing scalable backend systems, APIs and high-load solutions for real estate, healthtech and telecommunication sector.

Looking for a new challenge around the world with visa sponsorship to apply my knowledge.

## **Professional Experience**

**Senior .NET Developer** – NDA, Limassol (remote), 2025 – Present

- Migrating the complex legacy business logic from monolith .NET Framework to .NET 9;
- Supporting and contributing to the development of new feature for our clients worldwide, taking into consideration the specific requirements and localization needs in the gambling industry;
- Establishing and maintaining efficient workflows and standards for our development process, ensuring compliance with modern best practices and industry standards.

**Senior .NET Developer** – Beeline, Moscow (hybrid), 2021 – 2024

- Successfully launched a new product called "Payments" for audience of over 10 million users, that has increased the company's profit by 13% (~1.7 billion rubles) a year;
- Developed APIs for consumers in cross-functional team with horizontal and vertical scaling;
- Participated in the development of beta version of voice assistant, as company's startup.

**Senior/Tech Lead .NET Developer** – Doctor At Work, Moscow (hybrid), 2019 – 2021

- Developed and launched a number of new features including Channels, Reactions, Comments, News Feed as part of their comprehensive messenger and website update;
- Launched the internal currency's monetization in social network and integrated with payment gateways, thereby increased audience engagement over 23% and the volume of client content;
- Performed releases, code review, managed the flow, decomposed and evaluated tasks.

**Middle .Net Full-stack Developer** – Realestate.ru, Moscow, 2013 – 2019

- Designed from scratch and developed a personal account for users and corporate clients;
- Optimized the website page speed, monitoring the processing of large amounts of data from clients;
- Developed the website UI, handled the entire pool of work from the frontend to server maintenance.

## **Education**

Moscow Power Engineering Institute | 2008 – 2013 | Automatic Systems and Networks

## **Key Skills & Technologies**

- Backend: .NET Core 3+, .NET Framework 4.8, ASP.NET MVC, RabbitMQ, Kafka, SignalR;
- Databases: MS SQL, MySQL, MongoDB, Redis, Elasticsearch, EF Core, Dapper;
- DevOps: TeamCity, Gitlab CI/CD, Octopus, Kibana, Grafana, Prometheus, Docker, K8S;
- Frontend: JS, TS, KnockoutJS, ReactJS.

## **Recommendations**
